How to read this report

One CSV row counts as one enrolment record, not a verified unique learner or course completion. These figures must not be described as 40,024 individual graduates.

Reporting groups differ from original course-date months. The adjusted period includes records outside July 2025 to June 2026; it is not an unadjusted last-12-month completion count.

* All eight Australian states and territories appear in the supplied street-address data. This describes where learners live, not where they trained.
